

Engineers Australia Excellence Awards: People & Projects 2023

Acknowledging and rewarding excellence

Engineers Australia's excellence awards program promotes the prestige of the practice of engineering while recognising the outstanding achievements of individual engineering professionals.

The excellence awards continue to honour the outstanding achievements of the country's engineers across the broad categories of people and projects.

Benefits

Participating in the excellence awards helps to expand your professional network and amplify your engineering accomplishments.

- Invitation to attend the local and national events
- Profiled in the showcase booklet
- Receive a marketing toolkit to share with your networks
- Recognised as part of the campaign through Engineers Australia owned media channels
- Access to discounted registration for events and professional development opportunities
- Opportunity to present at Engineers Australia's local event to showcase your journey and experience

Key Dates

Nominations open: **4 April 2023**

Nominations close: **4 July 2023**

Local events across the country: **4-8 September 2023**

National event in Melbourne: **29 November 2023**

Categories

The award categories are:

Emerging engineer of the year awards: recognise outstanding early career engineers who show innovation and resourcefulness in their work.

Engineer of the year awards: recognise the outstanding work of engineering professionals who embody the highest technical, professional and community service standards in engineering.

Achievement Awards: recognise the important engineering achievements of individuals at all career stages and across Engineers Australia's colleges and engineering communities.

Distinguished Career Awards: recognise the conspicuous service of individuals who have given longstanding and prominent service to the profession.

Projects award: recognise Australia's top engineering projects and the teams behind them. It inspires and encourages engineering distinction through teamwork, innovation and technical excellence.
